

# The Proper Application of **Apotex Matrix Patch**

Fentanyl Transdermal System ©

## How to Apply

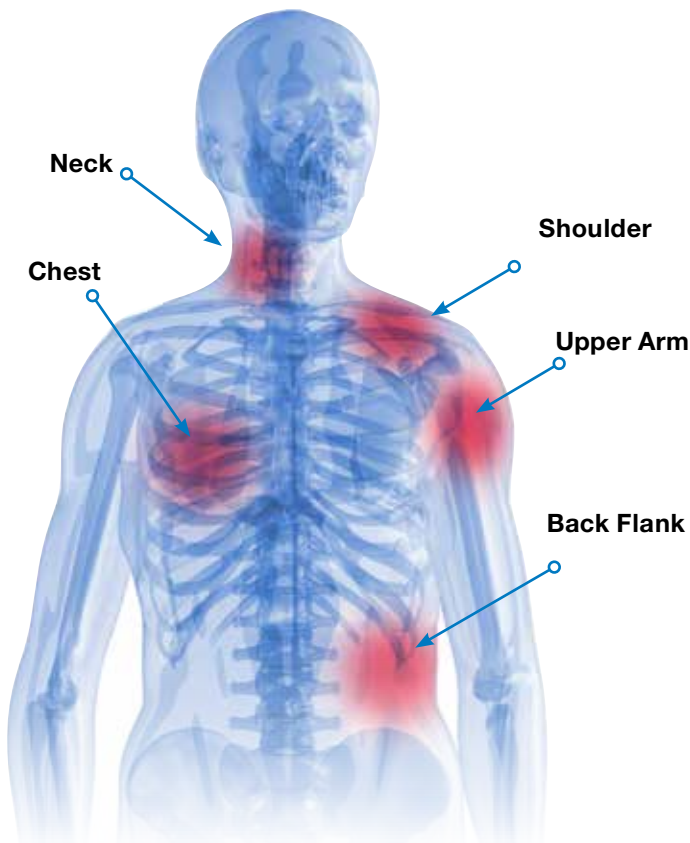

- Use scissors to carefully cut open the pouch containing the patch and remove it.
- Look at the patch to make sure it is not damaged.
- Peel the liner from the back of the patch one half at a time and discard.
- Avoid touching the sticky adhesive surface with your fingers.
- Apply the exposed sticky adhesive side of the patch to the selected application site.
- Smooth down with firm pressure using your fingers or palm over the entire patch and hold for 30 seconds.
- Gently smooth down the entire edge of the patch to make sure the patch is well adhered to the skin.
- Wash hands immediately after applying patch.

## How to Dispose

- For disposal, fold in half with sticky sides together. Immediately flush the used patch down the toilet.

## Finding a Site

- Select a patch application site that is clean, dry and free from excessive hair.
- Do not use oils or lotions on the application site as this might interfere with the performance of the patch.
